

HYBRID CLOUD BACKUP & DISASTER RECOVERY

Powered by MAX Focus

BE SAFE. NOT SORRY.

Prepare your business for the inevitable with hybrid-cloud backup & recovery

Every business has challenges that impact operations. Human error, computer and server failures and even natural disasters can affect any business. So how do you prepare to make sure your business stays running?

Just like your car comes with a spare tire, your business needs a simple and effective solution to get “back on the road” in the event of a data, system, or even complete business outage. It may only happen a few times in your life, but it happens to every business eventually.

BACKING YOUR BUSINESS UP TO THE CLOUD: SIMPLIFIED DATA PROTECTION

To prepare for the “when” (and not “if”), you need a backup solution in place that allows your business to recover, regardless of what application, data set, server or location suffers a failure.

By backing up to the cloud, you have a copy of every part of your business ready and available. By using the cloud, you achieve a recovered business without expensive hardware, complex systems and one more thing to support. Instead, your critical data is securely backed up

using state-of-the-art compression technology, allowing your Internet connection to quickly backup and recover your critical data and systems.

Cost-Effective Backups

You don't need to worry about new hardware or expensive tape systems; cloud backup and recovery is billed as a low (fixed) monthly expense. (*based on your usage. So your backup costs only grow as your business does.*)

VX COMPANY

Ensuring the complete recoverability of its organization to separate itself from others

Using cloud backup & recovery, powered by MAX Focus, VX Company routinely runs live restore testing. Once a year, VX shuts down the main office, goes to an alternate location, and recovers their entire network - all in less than one day. This demonstrates VX Company's ability to recover data quickly and easily when partnered with MAX Focus its powerful hybrid backup & recovery solution.

We are there for you every step of the way

We want to not just provide you the tools to ensure your business gets backup and running, but also manage the entire process from setup, to backup, to recovery.

GETTING YOU BACKED UP

The on-boarding experience is completely managed by qualified DuPosium engineers. Depending on the environment, a DuPosium engineer will either connect remotely or perform a local seed backup. DuPosium will supply you with documentation of all data and systems being backed up.

PRO ACTIVE MONITORING

Do you know when most people find problems with their backups? Right! - When they need to restore, when it's too late. Pro-active monitoring is the missing key in securing your ability to recover anything.

RESTORE & DISASTER RECOVERY SUPPORT

When something does go wrong, call us and we'll make sure you can go back right to before things went wrong. So you can relax and not worry about anything.

TWO LOCATIONS FOR BETTER PROTECTION

Even a backup plan, should have a backup plan. Our backups have one copy onsite and one copy offsite. That way, you know you can recover, even without an Internet connection!

OUR GUARANTEE

Simply put, we provide assurance. DuPosium hybrid cloud backup & recovery, powered by IASO, gives you piece of mind when it comes to your ability to get your business backup and running:

✓ FASTEST RECOVERY POSSIBLE

The fastest restore source (cloud or local) is automatically chosen to ensure your data is recovered as quickly as possible.

✓ ANYTIME, ANYWHERE RECOVERY

With optional synchronization to local storage, you can rest assured that a backup is available at any location, with or without the Internet.

✓ PRIVACY, SECURITY AND COMPLIANCY

Backups and recovery are transmitted over a secure channel and encrypted with a private key encryption so only *you* can see your data.

✓ NO CAPITAL EXPENSE

Backup and recovery costs shift to a manageable on-going operating expense that only grows as your business does.

GET BACKED UP AND BE PROTECTED

Give us a call and let us tailor a data protection program to best ensure you can always go back to right before things went wrong.

- ✓ **CALL US FOR FREE ADVICE** (no obligation)
- ✓ **GET A FREE TAILORED MADE PROPOSAL** (no obligation)
